----------	---------------------------	----------

Smá meira asdf afaasf testing test. $1 + 2 = 9$. Hér verður flott síða. lj lkjlklkj. asdf adsfasdf.

Since Pythagoras, we know that $1 + 2 = 9$.

```
alert('Hello, World!')
```

$$e^{i\pi} + 1 = 0 \quad (1)$$

Euler's identity, equation (1), was elected one of the most beautiful mathematical formulas.

$$\underline{x} = [x_1, \dots, x_n]^T$$

Setjum $b_y = -6b_x$ inn og fáum:

$$\begin{aligned} 9 &= \sqrt{b_x^2 + b_y^2} \\ 9 &= \sqrt{b_x^2 + b_y^2} \\ &= \sqrt{b_x^2 + (-6b_x)^2} \\ &= \sqrt{b_x^2 + 36b_x^2} \\ &= \sqrt{37b_x^2} \\ &= b_x \sqrt{37} \\ b_x &= \frac{9}{\sqrt{37}} \approx 1.480 \\ b_y &= -6b_x = \frac{-54}{\sqrt{37}} \approx -8.878 \end{aligned}$$

Vigur sem er samsíða $\bar{a} = (-1, 6)$ og hefur lengdina 9 er því

$$\bar{b} = \begin{pmatrix} \frac{9}{\sqrt{37}} \\ \frac{-54}{\sqrt{37}} \end{pmatrix}$$

Dæmi og lausn

Hér er dæmi og lausn

Annað dæmi og lausn sem er hægt að opna og loka

Hér er annað dæmi og lausn
